

Have your fee schedule beside the front door.

Census Knock knock

You: (videoing) Hi what is your name and job description please? (wait until they give it.) Great what can I do for you?

Census: Have you filled out the census form?

You: Wow it's so good of you to volunteer to come around this neighbourhood to make sure people have filled out their forms.

Census; Oh no I get paid to do this.

You: Wow you get paid! Well I don't work for nothing either. I'm happy to fill out the census form once I am paid for my time. Here's a copy of my fee schedule, you better take it to your superiors and see what they think. (Pass stunned Census the fee schedule) As I have said once I get paid then I will be happy to comply, (smile) goodbye (shut door).

Download evidence of your conditional acceptance on to your computer from your camera. Job done!!!

If they come back again just repeat the same process And ALWAYS RECORD.

If they say anything unexpected such as

You: Wow it's so good of you to volunteer to come around this neighbourhood to make sure people have filled out their forms.

Census Yes it is good of me to do this

You: So you don't get paid then?

Census: Oh yes I get paid

(then proceed with the above script)

or

You: Here's a copy of my fee schedule, you better take it to your superiors and see what they think. (Pass stunned Census the fee schedule)

Census: No I don't want that fee schedule you have to fill this out!!

You: (offer the fee schedule 3 times then say) You are refusing my Conditional Acceptance offer it looks like we have nothing left to talk about (smile) goodbye.

Now you have evidence they discharged your liability by refusing your honourable conditional acceptance three times.

If they get threatening or belligerent just say "Are you threatening me? I am feeling unsafe now, did you see the Trespass sign at my gate?"

Demand they leave your private property three times and if they refuse you can take them to court for trespass and they will owe you the sum on your trespass Notices.
